

Bridging the Gap Between Demand and Connection

MOBILE, SCALABLE, RELIABLE POWER

POWRBANK Battery Energy Storage Systems give utilities and developers a reliable way to supply temporary power during planned and unplanned outages, when demand surges from high-load consumers, and while projects await permanent grid connection and infrastructure upgrades.

Support Capacity, Power Quality & Infrastructure Flexibility

MEET PERFORMANCE & RELIABILITY TARGETS

Smart Voltage & Power Quality Control

Stable voltage via regulation and Volt/Var support

Adaptive Load Management

Peak shaving and load smoothing for grid resilience

SCADA Command Compatibility

Accepts and responds to SCADA system commands

Reliable Power During System Upgrades

Ensures uninterrupted service during maintenance

Power Backup & Emergency Response

Delivers dependable backup power when needed most

Interm Power for Grid Integration

Supports projects until permanent connection
